

FOMPIK Light Guide Probes

The Titan Micro-Probe Illumination Kits are the answer to proper illumination in those ultra small holes and cavities that pose special viewing problems because they are too small for light to enter properly.

The kits consists of: 6 Micro-Probes, 3 straight and 3 angled at 45 or 90 Degrees. In 3 diameters of 0.120", 0.058" & 0.028" and a 48" Long Silicone Sheathed Light Guide, a Stainless Steel S-Lock Sheathed Light Guide is available as an extra.

The probes are 4" long to allow entry into even the longest minute cavity. The kit also provided with 48" long connecting fiber optic light guide which has to be inserted into the FOI-150 Halogen Light Source or LuxPro LED Light Source which are extra.

The FOMPIK Fiber Optic Probe Kit should be an integral part of any Inspection-Quality Control Department, De-Burring Section, Micro-Drilling and Boring Operations.

Since all illumination from the Micro-Probes is "Cold Light", heat sensitivity is not a problem. The Micro-Probes can be used as Back Illumination for parts being examined under a microscope.

Applications include:

- Internal inspection of automotive and aviation engines and other parts and systems.
- Checking the interior of metal and plastic molds.
- Electronic assembly and service.
- Building inspection
- HVAC installation and repair
- Locksmiths
- Onsite repair technicians
- Security

Ordering Information

Model Number	Illumination
FOMPIK-45	Kit w/Light Guide, 3-45° & 3-0° Probes
FOMPIK-90	Kit w/Light Guide, 3-90° & 3-0° Probes

Accessories	
FOMPIK-120-0	Straight Probe 0.120" Diameter
FOMPIK-120-90	90 Degree Probe 0.120" Diameter
FOMPIK-120-45	45 Degree Probe 0.120" Diameter
FOMPIK-058-0	Straight Probe 0.058" Diameter
FOMPIK-058-90	90 Degree Probe 0.058" Diameter
FOMPIK-058-45	45 Degree Probe 0.058" Diameter
FOMPIK-028-0	Straight Probe 0.028" Diameter
FOMPIK-028-90	90 Degree Probe 0.028" Diameter
FOMPIK-028-45	45 Degree Probe 0.028" Diameter
FOMPIK-LG	Silicone Sheathed Light Guide
FOMPIK-MS	S. S. S Lock Sheathed Light Guide
