

TFLI Fluorescent Ring Illuminator

The TFLI Fluorescent Ring Illuminator is ideal for microscopic and macroscopic inspection, quality control, photographic application, assembly and biological analysis. The TFLI bathes the subject with 360° degrees of shadow-free illumination. Our reflector housing is cast from a high quality Aluminum alloy for durable and cool operation. The TFLI is treated with a baked on enamel finish which will provide long term durability.

The TFLI is the system for providing even diffused illumination. The B-TFLI Lamp is 18W and provides a color temperature of 6000° K, simulating natural white daylight.

Each TFLI is treated with a baked on enamel which seals against contamination making it useful in clean rooms. The TFLI comes with rubber tipped thumbscrews that provide simple and versatile mounting, they will clamp on to lenses from sizes 1.25" up to 2.15".

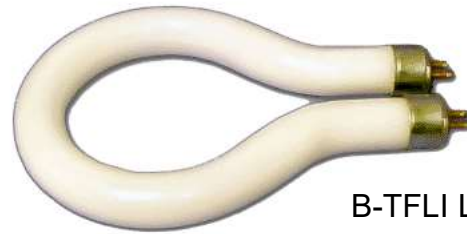

The TFLI has a modular construction which permits easy repair and lamp replacement.

TFLI Lamp is rated for over 4600 hours of operation.

Uses 120 Volt AC Adapter which is supplied with unit.
