

Sintered Shaped Diamond Wheels

Titan Shaped Diamond Wheels have Diamond Grains throughout. This multiple layer of abrasive leads to a long life. The applications and type of Air or Electric Grinder used to power them is similar to Standard Shaped Diamond Wheels. The Shank Diameter is 2.35mm and 35mm long. The pins are available in three grits. Each pin is also color coded designating the grit.

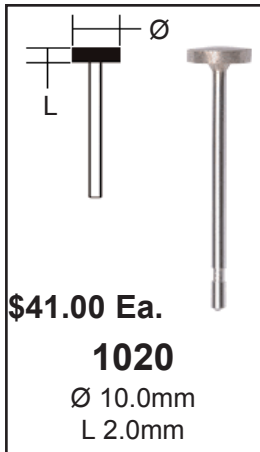

BLUE - 80/100

YELLOW - 140 Grit

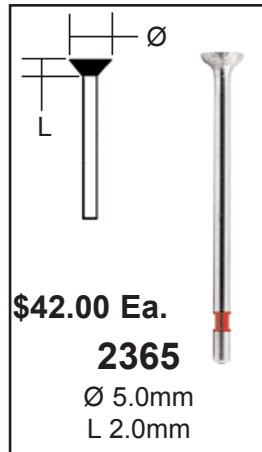

GREEN - 170 Grit

The wheels can be dressed with a 100 grit Aluminum Oxide or Silicon Carbide Dressing Stone.

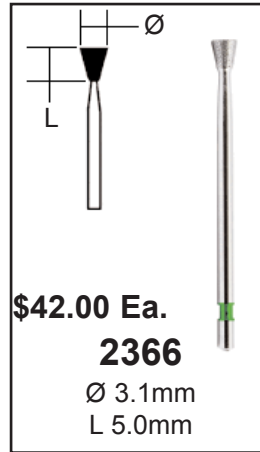

For your safety, we recommend that goggles be worn when using these wheels and that at least 1/2 of the shank length be carefully mounted in the holding chuck or collet.
